I have received an application from the Shell Company to acquire a plot of land at the extreme southern corner of Parcel 27 for use as a Benzine Filling Station. The parcel in question was allotted to the Chairman, Central Housing Commission for use by your Department (my GP/5/32(7) dated 27th November 1944, addressed to the Chairman, Central Housing Commission, with copy to you, refers). I would be obliged if you would let me know if you would be prepared to release the area now applied for.

I enclose herewith a plan showing the area in question and would be obliged if you would return it with your reply.

PA

3097/6/PE

August, 1945.

District Commissioner,
Samarra District,
Nablus.

Subject :- Kadoorie Agricultural School - Tulkarm
Town Planning Scheme.

I enclose herewith a plan received from the Principal showing the Kadoorie Agricultural school grounds and the new roads proposed under the town planning scheme for Tulkarm. The school boundaries are shown in ink and the proposed roads under the town planning scheme are shown in red pencil.

2. In brief, the new roads proposed under the town planning scheme will have the following effects:-

(a) The proposed scheme cuts through the school grounds by a new road marked a. By means of this road the farm buildings, the dairy and the cowbyre will all be severed from the main school grounds.

(b) The proposed new road marked a will also pass through the present arrangements for dipping cattle, and will entail the construction of a new cattle dip.

(c) A proposed new road marked B will enroach on the school grounds and will take therefrom an average width of about 50 ms. (It should be noted that the new road itself is 30 ms. wide).

(d) The proposed new road marked b will also sever the water well from the school grounds. Adjacent to the water well is a stone building of appreciable size used as stores, which will also be cut by the new road.

(e) A new road marked c will enroach on the eastern and south-eastern boundaries of the school.

3. The proposed three roads referred to above as a, b, and c, will cause a loss of about 60 dunums of school land. This loss, appreciable as it is, will not be more harmful than the division of the school grounds into three separate parts; i.e. a large part comprising the school grounds; a medium part containing the farm buildings; and a very small part containing a store building, as well as the only source of school water supply.

4. It will therefore be seen that should the proposed town planning scheme proceed in its present form, the work of the school, with its already limited grounds, will be handicapped to such an extent that it is questionable if it can function for the purpose for which it is intended.

P.T.O.

A/D → A/sms - Khairi di em

See 247

27/8

In the circumstances I must strongly oppose the scheme so far as it affects the school land and would request that early consideration be given to modifying the town planning scheme for Tulkarm with a view to avoiding any encroachment on the school property.

5. Road a should be completely eliminated and the by-pass road b, should be carried further west and north, the Tulkarm-Afula railway being aligned also further to the west and north.

Principal, Kadoorie Agricultural School, Tulkarm.
Director, Agriculture and Fisheries.

MS

Director of Education,
Jerusalem.

Subject:- Town Planning.

I enclose herewith a plan (in duplicate) showing the school grounds and the new roads proposed to be made under the town planning scheme for Tulkarm.

The school boundaries are shown in ink, and the proposed roads under the town planning scheme which effect the school grounds are shown in red pencil.

2. In brief, the new roads proposed under the town planning scheme will have the following effects:

a. The proposed scheme cuts through the school grounds a new road marked (a). By means of this road the farm buildings, the dairy, the cowbyre will all be severed from the main school grounds.

b. The proposed new road marked (a) will pass through the present arrangements for dipping cattle, and will entail the construction of a new cattle dip.

c. A proposed new road marked (b) will encroach on the school grounds and will take therefrom an average width of about 50 ms. (It should be noted that the new road itself is 30 ms. wide).

d. The proposed new road marked (b) will sever the water well from the school grounds. Adjacent to the water well is a stone building of appreciable size used as stores, which will also be cut off by the new road.

e. A new road marked (c) will encroach on the eastern, north-eastern and south-eastern boundaries of the school.

3. The proposed three roads referred to above as a, b, and c, will cause a loss of about 60 dunums of school land. This loss appreciable as it is, will not be more harmful than the division of the school grounds into three separate parts; i.e. a big part comprising the school grounds; a medium part containing the farm buildings; and a very small part containing a store building, as well as the only source of school water supply.

4. In view of what has been stated in paras. 2 & 3 above the two roads marked (a) and (b) should be very strongly opposed. The third road marked (c) will not affect the school very appreciably, and as such, should not meet with strong objection.

Director of Agriculture and Fisheries,
Jerusalem.Subject:- Outline Town Planning Scheme for Tulkarm
Town - Kadoorie Agricultural School.

An Outline Town Planning Scheme for the Town of
Tulkarm has now been deposited in the Offices of the Municipal
Commission of Tulkarm with the object of allowing those concerned
to lodge their objections.

Your attention is invited to this plan as touching
the Kadoorie Agricultural School, as you may wish to object.

*Pls. ascertain
whether this affects in
any way. L.S. 2/1*

J. Samuella
Assistant District Commissioner,
Tulkarm.

BY HAND

26 July, 1945.

DIRECTOR OF LAND SETTLEMENT.

With reference to your letter No. GP/5/32(7) of 21st July, I regret that a mistake has been made in estimating the loss of revenue. This land which is now occupied by the military could be used for growing field crops and if it were used for this purpose it would not be necessary to buy the equivalent production. I estimate the loss on this account at LP.55 per annum.

2. If, on the other hand, the principle has been accepted that no account should be taken of loss to Government ~~potential~~ or revenue, direct or indirect, then a rent of 330 mils per dunum is the correct compensation.

Tulkarm.

Reference : Your letter No. AG/15/14 dated
5th May, 1945.

I suggested to the A.D. Hirings that your estimate of LP.200 would supply a basis for fixing the rent. In reply he informed me that the land is in Category 11 of the Rural Property Tax Ordinance; that the rent payable by the War Department for land in this category is 330 mils per dunum; and that he proposed to pay LP.7.260 mils in settlement of the rent for 22 dunums. He further stated that the rate of 330 mils per dunum had been approved by Government, and in response to my further enquiry sent me a copy of his letter No. 7254/19/Hgs dated 11th August, 1944, and addressed to the Chief Secretary with copy to you. Your reference is AG/12/46/B dated 18th May, 1944.

2. I shall be grateful for your observations. It looks as though I should be in an embarrassing position if I claimed even a third of LP.200 as rent due to Government when you have approved a rate of 330 mils per dunum for similar land.

W. H. Buncastle

A.D. Hirings.

Subject:- Barcels 25 & 27 of
Block 8175 - State
Domain GP/5/32(7),
Tulkarm.

Reference: Your S/773/Hgs. of 6th
March and S/799/Hgs. of
6th March, 1945.

I am informed that Government sustains a loss of revenue by reason of the Military occupation of about 28 dunums of this land on which 22 huts for accommodating troops have been erected. This land is regularly cropped and the value of the crop of barley which would have been grown this year is estimated by the Director of Agriculture at LP.200. It is suggested that this figure will supply a satisfactory basis for fixing the rent due to Government. Alternatively, an assessment of rent could be made by a valuation committee composed of representatives of the Hirings Service, the Department of Agriculture and this

P.T.O.

PA.13

department. I shall be glad
to have your views.

5^K May, 1945

Director of Land Settlement.

Sub: Parcels 25 and 27 of Block 8175 -
State Domain GP/5/32(7) - Tulkarm.
Ref: Your GP/5/52(7) of 20.4.45.

With regard to your above-mentioned letter, I am of the opinion that an actual loss of revenue is occasioned by the military occupation of 28 dunums of barley-producing land. The revenue derived from this particular piece of land has never been accounted for separately and I regret therefore, that no figures are available in this respect.

2. I trust, however, that the crop value which I estimate at around £P.200.- will supply a satisfactory basis for the fixation of rent, alternatively a fresh assessment could be prepared by a valuation committee composed of representatives of both parties.

Government has agreed with the Army that rent for the occupation of State Domain shall be charged only when there is an actual as distinct from a potential loss of revenue occasioned by the military occupation. In the circumstances I doubt whether a claim for rent would be successful but if you think a claim ~~shall~~ should be made I should be grateful if you would let me know what revenue was derived from this land in previous years and how it was accounted for.

KADOORIE AGRICULTURAL
SCHOOL, TULKARM.

236

27.3.45.

Director of Education,
Jerusalem.

Subject :- Kadoorie Agricultural School - Tulkarm,
Farm lands occupied by military.

Reference:- Your letter No.3308/6/4 of 22.3.1945.

I agree that there is no actual loss of revenue to Government as a result of the occupation of parts of the school land by the military. My observations on the latter part of the minute by the Director of Agriculture and Fisheries will be given in the succeeding paragraphs.

2. As I recently informed Mr. Tomlinson on the telephone, the military are now occupying three pieces of land: namely:

- a) An area of 28 dunums on which now stand 22 sheds of varying sizes for accommodating troops.
- b) An area of about 2 dunums on which now stand 5 workshops.
- c) An area of about 22 dunums on which 16 stables now stand.

The total area of the three pieces of land occupied by

P.T.O.

the military is therefore 52 dunums.

3. Government is not involved in extra expenditure; because the piece of land mentioned in (a) of para. 2 above, used to be under crops. The piece of land referred to in (b) serves no special purpose; while that referred to in (c) will be annexed to the orchard and olive trees plot when vacated. The most important loss to Government results therefore from the occupation by the military of the piece of land referred to in (a), which piece would produce a crop (say barley) in the amount of EP.350.

4. The loss to Government and the public should not, in my submission, be measured in cash only. The loss in revenue or kind becomes negligible and quite insignificant if compared with the difficulties encountered in running the school and protecting its grounds from trespassers so long as parts of the school land remain occupied by the military.

18th February, 1943.

GOVERNMENT OF PALESTINE Dept. of Agriculture & Fisheries JERUSALEM HEADQUARTERS 20 FEB. 1943 File A2

Subject: New Road.
Reference: Your file No. AG/15/14 and a copy of a
letter from Director, P.W.D. No. 9/33/4/2 of 7.7.42.

I am now informed by the Foreman, P.W. Dept., Tulkarm, that he has received instructions to ~~start the~~ survey of the by-pass and to start setting pegs etc. through the Western side of our fields.

According to this scheme, not less than 10 thousand square meters of our best lands will be isolated from the main land in the form of a strip of land about 50 meters wide and 200 meters long rendering it practically useless for farming. In addition, the well, the automatic switches and motor pump units will be completely isolated and separated from the main farm by a 30 meters wide road, and will necessitate the employment of a special ghaffir to guard the place, this, in addition to exposing the Western fields of the farm to constant tresspassing.

The difficulties of managing a farm ^{encircled} ~~circled~~ with roads near a town speak, for itself, we are already experiencing much difficulties with our properly fenced East boundaries, the difficulties will become ~~acute~~ when we know that the Western boundaries are exposed with no fencing possibility. Besides, our small farm will lose not less than about 6000 square meters for this new road, bringing the total loss to about 17 dunums.

It will be in the interest of the school and its farm that the scheme marked in green on the plan submitted to you with my letter No. L.1/1076 of July, 1942, may be accepted by the Public Works Department; as this alignment will cross our lands along the East and North boundaries situated on poor, shallow soil with chalky substrata and will not add to our present difficulties.

I shall be grateful if the matter may be taken up very urgently with the Director of Public Works who promised to take into consideration your representations when it comes to the matter of deciding which scheme shall be followed.

The Public Works Surveyor has been allowed to-day to start his work in the fields and am to ask that immediate steps be taken in this respect before it is too late.

Am. Kadoorie
Principal.

July 7, 1942.

Director of
Agriculture and Fisheries.

Subject:- Roads in Tulkarm.

250

Reference:- Your AG/15/14 of 6-7-1942.

Alignments for new roads in Tulkarm are being investigated but no decision has yet been come to regarding which alignment will be selected. When it comes to the matter of deciding which shall be followed your representations will be taken into consideration. My information at the moment is that in all probability a line to the north of the existing main School Building will be adopted in which case your farm lands will not be interfered with. In this connection however I must make it clear that a decision has yet to be made.

HEADQUARTERS

6-1 JUL 1942

15/14

Subject: Farm Lands.

The Public Works Department are trying to start a new road across our lands as marked red on the attached sketch map. This scheme will deprive us of ~~our~~ a large area of our best lands and scatters the fields and isolates the well and its pumps, the brooder house and destroys our sub-tropical plantations, the New orchard and turns to waste a long strip of land to the west of the red line.

The District Engineer informed me that the scheme is still a proposal and should the Director of Agriculture disagree with it the matter could be settled between him and the Director of the P.W.D.

I shall be grateful if urgent steps may be taken to save the school lands from this kind of partitions, and isolations otherwise this scheme will contribute to our present difficulties.

It will be recalled that the original scheme for diverting the Tulkarm-Nablus Road takes the road to the north of the school buildings through waste and chalk lands which the school considers useless. This scheme is marked green, it leaves the best lands intact and helps in separating the school lands from the troublesome neighbour to the north of the buildings.

The new scheme marked red, if carried out, the farm lands will be exposed to trespassers as no fences could be erected in the present circumstances.

The P.W. surveyors are working within our lands and I shall be grateful if this matter meets with your immediate attention.

I, Raffoul Khawam, on behalf of the Kadoorie Agricultural School, Tulkarm, took over this 11th day of November, 1940, from Hassan Eff. Mikdadi, the undermentioned which lie on plot D/Tul/118 which was leased in accordance with Lease Agreement dated 17.2.1940 :-

1. Two iron frame gates with two shutters each.
2. 138 Fencing post to the Southern direction.
3. 89 Fencing post to the Eastern direction.
4. Wire netting to the South - 150 metres long and $1\frac{1}{2}$ metres high.
5. Wire netting to the East - 88 metres long and $1\frac{1}{2}$ metres in height.

The discrepancy is therefore 52 fencing posts and 367 metres of wire netting.

Signed.	Abu Zahra	R. Khawam	Hassan Mikdadi
	on behalf of		
	District Officer	Taking over	Handing over.

Note : 1. The Committee formed by representatives of the School and the District Officer have considered each fencing post unit as one while in fact each fencing post is composed of three posts and therefore the deficiency is 14 and not 52 posts as the total posts including the two gates is 19.

Sgd. Hassan Mikdadi.

Note 2. When handing over (to Hassan Eff) each fencing post unit was counted as one as is the rule.

grove from which it is intended to export are found to have reached an adequate state of maturity and colour as described in Rule 17 paragraph 5.

(4) Before picking any oranges which it is intended to export prior to the twentieth day of November, or any grapefruit which it is intended to export prior to the first day of October, the exporter shall notify the Chief Fruit Inspector and pay a fee of one pound for each examination of the citrus fruit in each grove.

(5) The Chief Fruit Inspector may subject all or any grapefruit submitted for inspection between the first and fifteenth of October to a maturity test, and shall have power to refuse export of any fruit which does not conform to the following standards:-

Juice	40 per centum
Sugar Acid Ratio	5.5 : 1
Yellow Colour	25 per centum.

15- 18. Nothing in these rules contained shall be deemed to apply to shipments of citrus fruit to Syria, Lebanon and Trans-Jordan, except that cases shipped railed or transported by road to these countries shall bear the country of destination on the side of the cases.

Export of fruit to certain countries.

16- 19.(1) Citrus fruit intended for export to Syria Lebanon or Trans-Jordan shall be stored separately from any other fruit and only in such stores or accommodation as may be prescribed by the Chief Fruit Inspector for this purpose.

Storage of fruit.

(2) Citrus fruit intended for export under the provisions of these rules otherwise than to Syria, Lebanon or Trans-jordan shall not be stored together with any other fruit, but shall only be stored in such stores or accommodation as may be prescribed by the Chief Fruit Inspector for this purpose.

17- 20.(1) An intending exporter of citrus fruit shall apply in writing to the Chief Fruit Inspector not later than the first day of October in each year to be registered as an exporter of citrus fruit. Any application for registration after the first day of October in any citrus fruit season shall be liable to a fee of one pound.

Application for registration as exporter.

(2) An intending exporter must produce at the time of applying for registration, a Bank guarantee that he has a deposit of one thousand pounds or documentary evidence that he owns property to the same value in his own right.

Dept. of Agriculture & Fisheries
JERUSALEM
HEADQUARTERS
10 OCT. 1940
File No. 15/10

Director of Agriculture
and Fisheries.

Subject: Leasing Agricultural School Land
200 dunums, D/Tul/118.

Reference: Your letter No. 15/14 dated 25th
August, 1940.

Approved

I attach hereto a list of applications for
leasing the above-mentioned land showing rentals and
conditions offered by applicants. The highest bidder is
Aref Abu Sharifeh.

I shall be grateful if the matter is taken up
with the Director of Land Settlement to prepare the
agreement on the same conditions of the last agreement,
with the following alterations :-

- (a) Name of Lessee: Aref Mahmoud Abu Sharifeh, Tulkarm.
- (b) Agreement to terminate on the 31st August, 1941.
- (c) The rent is £P. 40.- cash in advance.
- (d) One half of the area should be sown to cereals
(wheat and/or barley) and the other half under
Catani (Legumes), preferably Foul Kubrusi.

Sir,

Ref. your letter dated 8.8.40 for leasing K. A. S. lands at Tulkarm and your intention to use these lands for local production of foodstuffs. I would point out that I am prepared to lease such lands for the above purpose and according to your specifications. I am also prepared to pay the cost of seed if you have better quality seed and to adopt the best technical methods in the cultivation.

I hope you will encourage me in this scheme in view of my efforts to promote agriculture in this country.

considers that they could be much more appropriately

performed by the Board acting on behalf of the industry.

(w) authorizes the Board to fix the dates of the export season for the different varieties of citrus for the country generally and/or for certain areas. This is an elaboration of somewhat similar powers conferred under the Fruit Export Ordinance.

(x) and (y) relate to the fixation of standard production with a view to quantitative allocation of shipping space when such a course is found to be necessary. This question, with the complementary coupon system is discussed later in the Report (per.29).

(z) authorizes the Board to examine and report upon any matter relative to the citrus industry specifically referred to it by the High Commissioner. The recent applications in regard to possible Government Loans to the industry might be cited as an appropriate question for detailed examination by the Board

Sir,

I have the honor to address you on the subject of lease of Kadoorie School lands for 1940/41.

If you are disposed to lease the above lands, I am prepared to undertake this lease which comprises tractor ploughing, manuring and use of thereof a period of one year i.e. 1941. I am undertake to hand over the lands promptly upon the expiry of the lease contract, and to pay rent in advance.

I intend to use the lands for cultivation of American melon varieties (~~about 10-15~~) (about 10-15) and later propagation of the most suitable varieties.

Awaiting the favour of an early reply

GOVERNMENT OF PALESTINE.

STATE DOMAINS.

Agreement for Agricultural Lands.

An Agreement made this 17th day of February one thousand nine hundred and thirty-four between the Director of Agriculture & Fisheries on behalf of the Government of Palestine (hereinafter called the Landlord) of the one part and Hasan Eff. Mikdadi of Tulkarm his heirs and assigns (hereinafter called the Tenant) of the other part.

WHEREBY the Landlord agrees to let and the Tenant agrees to take all that area of land known as New land (El. Hayazi'a) in the Kadoorie Agricultural School of Tulkarm in the Sub-District of Tulkarm and Samaria District extending to an area of 200.184 M2 (Two hundred and 184 sq. meters) marked 'A' and delineated in the attached hereto and in the Tabu Register of Deed No. Vol. Folio dated for the period of 8 months and 15 days from the fifteenth day of January, 1940 to the thirtieth day of September, 1940 (determinable nevertheless as hereinafter mentioned) at a rent of £P.30.- payable as hereinafter mentioned.

The Tenant hereby agrees.

1. To pay the rent in the manner hereinafter set out.
2. To pay in addition to the Rural Property Tax a rent without any deduction equal to the amount of the rural property tax due on the said land.
- Or 2. To pay in addition to the Rural Property Tax, a yearly rent of Thirty Palestine Pounds (L.P. 30.-) for the period of the lease instalments on or before the day of each of the months of in every year, the first of such payments being made on the execution hereof.
3. To keep the outside and inside of any buildings now erected or hereafter to be erected upon the premises in good and tenantable repair, fair wear and tear only excepted and to hand over in such condition at the expiration or other determination of this agreement.
4. To maintain and keep all water-courses, drains and channels in good order and condition together with all gutters, pipes, etc., and conform to the terms of the Antimalarial Ordinance.
5. To cultivate the land to the satisfaction of the Landlord and to pay to the Landlord a further rent of per dunom for such part of the land as is capable of cultivation and which remains out of cultivation during any year of the tenancy hereby created such additional rent to be paid at such time as Tax is payable in respect of the land and the amount thereof to be determined by the Landlord.
6. Not to sublet, assign, mortgage or otherwise dispose of the said land without the written consent of the Landlord.
7. To pay all Government and Local rates and taxes and be subject to all orders and regulations applicable to land of a like nature in the said District or hereafter made payable or applicable.
8. Not to erect buildings nor make alterations or additions to existing buildings on the said property without the consent in writing of the Landlord is first obtained and any such structural alterations or additions so made shall be in accordance with plans and designs first approved by the Landlord and completed to his satisfaction. The Landlord shall not be liable for any expenditure incurred by the Tenant in respect of repairs and improvements nor shall he be liable for compensation for such on the determination of the tenancy.
9. To remove any building or erection which he may place on the said land without the consent of the Landlord at the expiration or sooner determination of the tenancy, if required by the Landlord, and restore the premises to their original state.

~~10.~~ If at any time during the currency of the term hereby created the Tenant shall fail to pay the rent in manner aforesaid or to observe and perform any of the terms of this agreement, the term hereby created shall be forfeited and the Landlord may forthwith re-enter upon the said premises and hereafter possess the same as though this agreement had never been made, provided

- (a) that entry by the Landlord shall not affect the liability of the Tenant in respect of any obligation for non-payment of rent or non-observance of any of the terms of this agreement to which he may be subject at the date of such re-entry.
- (b) that the Landlord shall not re-enter upon the premises for a breach of any term of this agreement other than non-payment of rent or failure to cultivate the land demised for a period of one year, unless notice of the breach has been served upon the Tenant and the Tenant has during the period of one month from the date of notice failed to comply with the terms thereof.

10. ~~11.~~ Quietly to yield up the premises so let and all fixtures thereon the property of the Landlord at the expiration or sooner determination of the term hereby created in good and tenantable repair and clean condition and fit for occupation by the incoming tenant.

11. ~~12.~~ To allow the Landlord or his representative to inspect the premises at any reasonable time

The Landlord hereby agrees:

1. That the Tenant shall be entitled to irrigate the said land with such water as may be found thereon provided that he shall conform to the terms of the Antimalarial Ordinance and shall submit any plans for new works of irrigation to the Landlord and that he shall not obstruct any water-course or interfere with the free flow of water to adjacent lands that have hitherto enjoyed the use of such water except with the previous written consent of the Landlord.

* That the Tenant paying the rent and performing the conditions hereinbefore contained shall quietly hold and enjoy the premises during the tenancy without any unlawful interruption by the Landlord.

~~Special Conditions:-~~

In witness whereof the parties hereto set their hands the day and year first above mentioned.

Signed by the Landlord

17th

February

--- forty Agreement for Agricultural Lands. ---

Hanan Eff. Wikkada this day of Tulkarm. one thousand nine hundred and thirty. between

on behalf of the Government of Palestine (hereinafter called the Landlord) of the one part and

New land (El Hayazi's) of Kadoorie Agricultural School

his heirs (hereinafter called the Tenant) of the other part. Tulkarm

WHEREBY the Landlord agrees to let and the Tenant agrees to take all 200.184 sq. meters (two hundred dunums & 184 sq. meters) marked 'A' and delineated in red

in the Sub-District of

and District extending to an area of 8 months and 15 days

fifteenth January, less and more fully described in the schedule and plan

attached thereto and in the Tax Register of Deed No. Vol.

dated for the period of

from the day of 19 to the day

of 19 (determinable nevertheless as hereinafter mentioned) at a rent of

payable as hereinafter mentioned.

The Tenant hereby agrees.

1. To pay the rent in the manner hereinafter set out. Pounds 30.- Thirty Palestine for the period of the lessee

2. To pay in addition to the Rural Property Tax a rent without any deduction equal to the amount of the rural property tax due on the said land.

Or 2. To pay in addition to the Rural Property Tax, a yearly rent of

fences (L.P. mils) payable in

instalments on or before the day of each of the months

of in every year, the first of such payments

being made on the execution hereof.

3. To keep the outside and inside of any buildings now erected or hereafter to be erected upon the premises in good and tenantable repair, fair wear and tear only excepted and to hand over in such condition at the expiration or other determination of this agreement.

4. To maintain and keep all water courses, drains and channels in good order and condition together with all gutters, pipes, etc. and conform to the terms of the Antimalarial Ordinance.

5. To cultivate the land to the satisfaction of the Landlord and to pay to the Landlord a further rent of per dunom for such part of the land as is capable of cultivation and which remains out of cultivation during any year of the tenancy hereby created such additional rent to be paid at such time as Tax is payable in respect of the land and the amount thereof to be determined by the Landlord.

6. Not to sublet, assign, mortgage or otherwise dispose of the said land without the written consent of the Landlord

7. To pay all Government and Local rates and taxes and be subject to all orders and regulations applicable to land of a like nature in the said District or hereafter made payable or applicable.

8. Not to erect buildings nor make alterations or additions to existing buildings on the said property without the consent in writing of the Landlord is first obtained and any such structural alterations or additions so made shall be in accordance with plans and designs first approved by the Landlord and completed to his satisfaction. The Landlord shall not be liable for any expenditure incurred by the Tenant in respect of repairs and improvements nor shall he be liable for compensation for such on the determination of the tenancy.

9. To remove any building or erection which he may place on the said land without the consent of the Landlord at the expiration or sooner determination of the tenancy, if required by the Landlord, and restore the premises to their original state.

10. If at any time during the currency of the term hereby created the Tenant shall fail to pay the rent in manner aforesaid or to observe and perform any of the terms of this agreement, the term hereby created shall be forfeited and the Landlord may forthwith re-enter upon the said premises and hereafter possess the same as though this agreement had never been made, provided

(a) that entry by the Landlord shall not affect the liability of the Tenant in respect of any obligation for non-payment of rent or non-observance of any of the terms of this agreement to which he may be subject at the date of such re-entry.

(b) that the Landlord shall not re-enter upon the premises for a breach of any term of this agreement other than non-payment of rent or failure to cultivate the land demised for a period of one year, unless notice of the breach has been served upon the Tenant and the Tenant has during the period of one month from the date of notice failed to comply with the terms thereof.

10. 11. Quietly to yield up the premises so let and all fixtures thereon the property of the Landlord at the expiration or sooner determination of the term hereby created in good and tenantable repair and clean condition and fit for occupation by the incoming tenant.

11. 12. To allow the Landlord or his representative to inspect the premises at any reasonable time

The Landlord hereby agrees :

1. That the Tenant shall be entitled to irrigate the said land with such water as may be found thereon provided that he shall conform to the terms of the Antimalarial Ordinance and shall submit any plans for new works of irrigation to the Landlord and that he shall not obstruct any water-course or interfere with the free flow of water to adjacent lands that have hitherto enjoyed the use of such water except with the previous written consent of the Landlord.

2. That the Tenant paying the rent and performing the conditions hereinbefore contained shall quietly hold and enjoy the premises during the tenancy without any unlawful interruption by the Landlord.

Special Conditions :—

In witness whereof the parties hereto set their hands the day and year first above mentioned.

24th February, 1940 --

District Officer, Tulkarm.

Reference:- Your letter No.477 of 19.2.40.
Subject:- Kadoorie Agric. School land (West) D/Tul/118.

I cannot agree to paragraph 2 of your above mentioned letter. Any amendments or additions to the conditions of lease should have been first brought to the notice of the Lessor for his approval.

2. There are two closed gates, one to the east and the other to the south of the land. The standing fences were inspected by my representative (Mr. Khawam) when Mikdadi was allowed to proceed with ploughing the land prior to signing the contract; this matter was discussed with Asst. District Commissioner i/c Tulkarm Sub-District in November and Mr. Khawam was instructed to hand over the existing gates and fences to the lessee.

3. Therefore it appears necessary that the relevant clause in the agreement requires correction accordingly, and I shall be glad if you would advise me of the action taken by you in this respect.

Director of Agriculture
& Fisheries.

Subject:-Land at Tulkarm.

Reference:-Your AG/15/14 of 15.2.40.

I do not quite follow your letter. You ask me to claim for rent of the field recently taken over by the Military. As far as I am aware no rent is paid for other Kad. Agric. School premises or lands. If you wish to claim annual rent for this land would you take up the matter with Government?

2. If all you wish to claim is the value of the crop of vetches I will take this up with the Area Claims Officer. But it appears to me that the claim for the estimated value of the crop must include the cost of tillage seeds etc.

3. You have also claimed for the cost of the repair to the fence. I understand that this fence was erected before the Military authorities took over the land. Its repair was necessary owing to removal of the former fence during the disturbances. It appears therefore that you only have a claim against Government for compensation for damage during the disturbances. Now that the field has been taken over by the Military authorities the new fence put up by you should, I think be included in the schedule of conditions and compensation for damage, if any, to the new fence should be paid on vacation of the field by the Military authorities.

Copy to:- A. Claims Officer

Should any objection be raised by property owners that they consider the assessment of the Werko to be excessive and a request for re-assessment be made, such a petitioner must forward a request, together with the reasons for complaint, to the Municipality or the District Council in the place where the said property is situated within fifteen days of the receipt of the Valuation Note. The Municipal or District Council will then examine the grounds for the complaint within one month of the receipt of the complaint. They will either approve the original assessment, sustain the complainant, or order a re-assessment and on this give their decision.

إذا تم طلب من البلدية أو المجلس المحلي في المنطقة المعنية فحص الطلب أو إعادة التقييم فسيكون على المراجع تقديم الطلب في غضون خمسة عشر يوماً من تاريخ تلقيه من البلدية أو المجلس المحلي في المنطقة المعنية. البلدية أو المجلس المحلي في المنطقة المعنية سوف تدرس أسباب الشكوى في غضون شهر من تاريخ تلقي الشكوى. وسوف إما توافق على التقييم الأصلي، أو تدعم المراجع، أو تطلب إعادة التقييم. وفي هذه الحالة، فإنهم سوف يعلنون قرارهم على البلدية أو المجلس المحلي في المنطقة المعنية.

המחלוקת תהיה בין בעלי הנכס למחלקת המיסוי או למועצה המקומית או למועצה המחוזית. במקרה כזה, המבקש יצטרך להגיש בקשה, יחד עם הסיבות לתלונה, למועצה המקומית או למועצה המחוזית במהלך חמשה עשר יום מיום קבלת הערה. המועצה המקומית או המחוזית תבדוק את טענות התלונה תוך חודש מיום קבלת התלונה. הן יאושרו, יתמכו או יבטלו. במקרה של בטול, יורה המחלקה על חידוש הערכת המיסוי.

GOVERNMENT OF PALESTINE.

STATE DOMAINS.

Agreement for Agricultural Lands.

An Agreement made this day of one thousand nine hundred and thirty between *the Director of Agriculture* on behalf of the Government of Palestine (hereinafter called the Landlord) of the one part and *Nassan off Mikoladi* of *Tulkarem* his heirs and assigns (hereinafter called the Tenant) of the other part.

WHEREBY the Landlord agrees to let and the Tenant agrees to take all that area of land known as *New Land* in the *Kadabrie* *Amir* *School* of *Tulkarem* in the Sub-District of *Tulkarem* and *Samaria* District extending to an area of *200* *Two hundred* dunoms more or less and more fully described in the schedule and plan attached hereto and in the Tabu Register of Deed No. Vol. Folio dated for the period of *Eight months* from the *15th* day of *January* 19*40* to the *30th* day of *September* 19*40* (determinable nevertheless as hereinafter mentioned) at a rent of *L.P. 30* payable as hereinafter mentioned.

The Tenant hereby agrees.

1. To pay the rent in the manner hereinafter set out.
2. To pay in addition to the Rural Property Tax a rent without any deduction equal to the amount of the rural property tax due on the said land.

Or 2. To pay in addition to the Rural Property Tax, a yearly rent of *(L.P. 30) Thirty* *lira* *and* *balut* (L.P. *30* mls) payable in *advance* instalments on or before the day of each of the months of in every year, the first of such payments being made on the execution hereof.

3. To keep the ~~outside and inside~~ *inside* of any buildings now erected or hereafter to be erected upon the premises in good and tenantable repair, fair wear and tear only excepted and to hand over in such condition at the expiration or other determination of this agreement.

4. To maintain and keep all water-courses, drains and channels in good order and condition together with all gutters, pipes, etc., and conform to the terms of the Antimalarial Ordinance.

5. To cultivate the land to the satisfaction of the Landlord and to pay to the Landlord a further rent of per dunom for such part of the land as is capable of cultivation and which remains out of cultivation during ~~any~~ *the* year of the tenancy hereby created such additional rent to be paid at such time as Tax is payable in respect of the land and the amount thereof to be determined by the Landlord.

6. Not to sublet, assign, mortgage or otherwise dispose of the said land without the written consent of the Landlord.

7. To pay all Government and Local rates and taxes and be subject to all orders and regulations applicable to land of a like nature in the said District or hereafter made payable or applicable.

8. Not to erect buildings nor make alterations or additions to existing buildings on the said property without the consent in writing of the Landlord is first obtained and any such structural alterations or additions so made shall be in accordance with plans and designs first approved by the Landlord and completed to his satisfaction. The Landlord shall not be liable for any expenditure incurred by the Tenant in respect of repairs and improvements nor shall he be liable for compensation for such on the determination of the tenancy.

9. To remove any building or erection which he may place on the said land without the consent of the Landlord at the expiration or sooner determination of the tenancy, if required by the Landlord, and restore the premises to their original state.

in the standing crop

10. If at any time during the currency of the term hereby created the Tenant shall fail to pay the rent in manner aforesaid or to observe and perform any of the terms of this agreement, the term hereby created shall be forfeited and the Landlord may forthwith re-enter upon the said premises and hereafter possess the same ^{land} as though this agreement had never been made, provided

(a) that entry by the Landlord shall not affect the liability of the Tenant in respect of any obligation for non-payment of rent or non-observance of any of the terms of this agreement to which he may be subject at the date of such re-entry.

(b) that the Landlord shall not re-enter upon the premises for a breach of any term of this agreement other than non-payment of rent or failure to cultivate the land demised for a period of ^{one year} ~~one year~~, unless notice of the breach has been served upon the Tenant and the Tenant has during the period of one month from the date of notice failed to comply with the terms thereof.

11. Quietly to yield up the premises so let and all fixtures thereon the property of the Landlord at the expiration or ~~sooner determination~~ of the term hereby created ~~in good and tenantable repair and clean condition and fit for occupation by the incoming tenant.~~

12. To allow the Landlord or his representative to inspect the premises at any reasonable time

The Landlord hereby agrees:

fences, paths and gates

1. That the Tenant shall be entitled to irrigate the said land with such water as may be found thereon provided that he shall conform to the terms of the Antimalarial Ordinance and shall submit any plans for new works of irrigation to the Landlord and that he shall not obstruct any water-course or interfere with the free flow of water to adjacent lands that have hitherto enjoyed the use of such water except with the previous written consent of the Landlord.

2. That the Tenant paying the rent and performing the conditions hereinbefore contained shall quietly hold and enjoy the premises during the tenancy without any unlawful interruption by the Landlord.

Special Conditions

13. The property being let by the Landlord to the Tenant for the purpose of maintaining supplies, the provisions of Clause 48A of the Defence Regulations, made under Article 3 of the Emergency Powers (Colonial Defence) Order in Council, 1939, and the Emergency Powers (Defence) Act, 1939, and cited as Defence (Amendment) Regulations (No. 3), 1939, shall be applicable and the provisions of the Cultivators (Protection) Ordinance should not apply to this property.

14. Rakhi. This term should be included in the agreement for the lease of the Kaduna Agricultural School.

(West)Reference: Letter NO.L.1.403 dated 9th
November, 1939. addressed to
me by the Principal of the
Kadoori Agricultural School
with copy to you

Before I can prepare a draft agreement
for the proposed lease of the land I shall be
obliged if you will furnish me with the follo-
wing particulars :

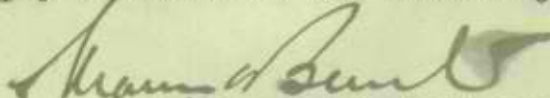

- (a) If rent is payable in cash what is
the amount?
- (b) If rent is payable in kind as part of
the crop produce what is the percentage of Gover-
nment share and what is its assessed value in cash?
- (c) Is the land to be let to one person
or more ?
- (d) Is the tenant to pay the rural property tax?
- (e) Are there any special conditions such as
the supply of seeds to the tenant by you?

Not received

I should be obliged if my above quoted letter may be cancelled as this property is now occupied by the Landless Arabs of Wadi Hawarith. This State Domain is known as Basset Sheikh Muhammad and was once allotted to the Department of Agriculture and Forests under the Director of Lands' letter D/Tul/32 of 25.10.27 for use in connection with the Arab Agricultural School at Tulkarm (Director of Agriculture's letter No. AG.212/35 of 17.10.25 refers).

2. This property was declared a Forest Reserve under No.191 in Official Gazette 216 of 1.8.23 and this was cancelled in Palestine Gazette No.452 of 12.7.34 when the land was handed over to the Development Officer for "Landless Arabs".

2. I shall be grateful if you will arrange for the Cancellation of the order declaring the Basset Qagun as a Forest Reserve and if you will inform the Principal of the Agricultural School at Tulkarm that the Bassa is to be handed over to the Jewish National Fund after this year's hay crop has been removed.

(Sgd) N.M. Foot.

Copy to District Officer, Tulkmrm.

T/80/104.

16th January, 1936.

Mr. J. Weitz,
The Jewish National Fund,
P.O. Box 283,
Jerusalem.

Sir,

I refer to our correspondence and conversations regarding a proposed exchange of land in the Tulkarm Sub-District.

2. I am now authorised to state that Government agrees to grant 400 dunums of Government land in the Basset Qaqun to the Jewish National Fund in exchange for 250 dunums of land owned by the Jewish National Fund in the neighbourhood of the Wadi Hawareth.

(the area of 250 dunums in the neighbourhood of Wadi Hawareth has already been demarcated by a Government surveyor and a surveyor of the Jewish National Fund on the ground and the area of 400 dunums in the Basset Qaqun will shortly be similarly demarcated.)

3. This exchange of land has been agreed upon the following conditions:-

- (i) That the 250 dunums in the neighbourhood of the Wadi Hawareth should be registered in the name of Government.
- (ii) That the 400 dunums in the Basset Qaqun should be registered in the name of the Jewish National Fund.
- (iii) That these registration transactions should not involve the Jewish National Fund in any expense (i.e. survey or registration fees).
- (iv) That Government should carry out whatever drainage in the area of 250 dunums is necessary under the antimalarial legislation in force from time to time.
- (v) That the Jewish National Fund should carry out whatever drainage in the area of 400 dunums is

1951

necessary under the antimalarial legislation in force from time to time.

- (vi) That Government should be permitted to remove the Eucalyptus trees now growing on the Basset Qagun.
 - (vii) That the Jewish National Fund should not take over the Basset Qagun until this year's hay crop has been removed from the land.
4. I shall be grateful if you will confirm that these proposals and conditions are acceptable to the Jewish National Fund.

Subject: Wadi Hawareth Arabs.

Reference: Your No. 1077 of 9. 12. 35.

I am directed to inform you that the schemes for the resettlement of the Southern Section of the Wadi Hawareth tribe which is set out in the note by the Assistant District Commissioner, Samaria Division, enclosed in your letter, is approved subject to the following modifications:-

(a) The land on which the tribesmen will be resettled should be registered in the name of Government and a long lease of it granted to the tribesmen.

(b) Government should not be pledged to undertake any antimalarial work beyond that which is necessary under the Antimalarial Ordinance in force from time to time.

2. Approval is on the following conditions:-

(i) That you are satisfied that Government is not surrendering in land greater value than is received under the exchange contemplated.

(ii) That the 107 families in question have already acquired by purchase and by lease sufficient land provide for their maintenance.

3. It is, as you will understand, agreed that the rent of the demised area should be one-fifth of the gross yield.

C.H.O.

Please see (3), (5) & (5A). I should be glad to have your ~~advice~~ views as to the suitability or otherwise of the soil & site at Tulkana K.A.S. for citrus before (6) is despatched to the Principal.

THM
13.11.37

8.

C.H.O.

The mechanical analysis (5a) shows a very heavy soil texture, about the same as the citrus soil of Jericho. I have seen rice groves on such soils, especially when drainage conditions were good. Sour orange should be the only stock.

VR
16.11.37.

(9)

Ag. Director

Plesse see 8 with which I agree. Drainage would appear to be advisable; in fact many groves could be improved in Palestine by more attention to drainage.

As regards the lime content of the soil, we have been given rather a shock lately by a statement of Anderssen's (Journ. Pomology XV. 2. p. 156) to the effect that "A high Ca content causes an increase in the amount of wastage due to mould during storage. Nitrogen has the reverse effect".

I presume Principal, Tulkarm, has a small area ~~only~~ in view for Citrus, and I see no objection to his planting under well drained conditions of soil. The trees should certainly be on ~~soil~~^{Sour} stock and planted in such a manner that the juncture of the principal lateral roots and trunk is immediately below the surface of the soil, not deeper.

Reference :- Your TK/I/A/1/4/646
of the 9th ultimo.

Principal,
Kadoorie Agricultural School,
Tulkarm.

I forward herewith, for your information and guidance, a copy of a letter from the Government Analyst, enclosing a statement of analytical determinations of the samples forwarded under your above-quoted letter.

2. The Chief Horticultural Officer informs me that the mechanical analysis shows a soil of about the same texture as the citrus soils of Jericho and that nice groves exist on such soils especially when drainage conditions are good. Drainage would therefore appear advisable. It is presumed that you have only a small area in view for Citrus and therefore the Chief Horticultural Officer sees no objection to your planting under well drained conditions of soil. The trees should ^{be on} bear sour stock and planted in such a manner that the juncture of the principal lateral roots and trunk is immediately below the surface of the soil, not deeper.

Nature of Sample Soil (20 samples)

Markings or description Tulkarm Agr. School from 1 to 10. Top soil and sub soil.

Sent in by Director of Agr. & Fisheries, Jeru. Date received 17-10-37

Laboratory Number 6920- 39

State of Seals -

The attached data show that the samples are all heavy calcareous soils; the lime (CaCO_3) varying from 10 to 46 per cent. The 3 samples selected for determination of nitrogen, phosphate and potash, show normal figures for this type of local soil.

2. If, after considering this analysis in conjunction with drainage and other local conditions, you require any further determinations on these samples, please specify.

3. You may perhaps consider the very high lime content in many of the samples to be unfavourable to citrus, but it will no doubt depend upon local experience with similar soils.

Twenty samples of soil have been
forwarded by the Principal of the Kadoorie
Agricultural School, Tulkarn, and they have been
transferred to your Laboratory.

It would be appreciated if you
would examine the samples :-

- (a) As to the suitability or otherwise
of the land for the propagation of
Citrus trees.
- (b) As to the deficiencies of plant
foods which may be apparent in the
soil from the examination of the
samples.

With reference to the analysis and report on the soils of the School estate dated 21.8.30, a copy of which was sent to you for retention, I would ask you to send me the topographical map with contour lines on which you have marked the spots from which soil samples were drawn. This will enable me to prepare a soil map of the estate ^{which you require} and to supplement or modify the interpretation of some important analytical findings.

2. Availing myself of this opportunity, I would recall that you have not yet returned the catalogue of Gallenkamp. As it is now urgently required for the preparation of Crown Agent's indents, I am to request you to return ^{the} catalogue with the least possible delay.

5

DEPARTMENT OF AGRICULTURE
AND FORESTS.
AMERICAN COLONY, JERUSALEM.

19th September, 1930.

R E P O R T

Director.

On the 7th instant I proceeded to Tulkarem Agricultural School and from there to Acre and Beisan Experimental Stations, in order to study the relation, as regards distribution and texture, of the soil to the laboratory work.

2. In Tulkarem I was conducted by Mr. Hammad who provided me with the necessary particulars about the School land and the programme of work carried thereon which corresponds to those prepared for Acre and Beisan Experimental Stations.

3. It was not possible for me to view the mature crops on the land being already harvested, therefore my study was limited to the comparison of the tabulated results, obtained from this year's crops, with my report on the analysis of the samples collected from all parts of the land.

4. It was obvious to me that plots of land with lighter texture yielded better crops than those grown on heavy black soil. Therefore the suggestion I made in my report on the School soil, that it requires a proper drainage system, is here repealed.

5. Before leaving Tulkarem I furnished Mr. Hammad with the necessary suggestions and advice as regards the treatment of the soil which he will probably include in his September report to you.

6. In Acre I was unfortunate to find the Station Superintendent absent on leave, and I could obtain no help to my study of that Station. On the other hand I had the opportunity to visit the Poultry and Bee-keeping Service which, I am glad to say, is modern in its arrangement and practice, and that from the results of experiments and good breed which I saw there, I have the impression that this Service promises considerable success in future.

7. With regards to this Service I wish to point out that I find it of vital necessity that the Analytical Service should cooperate with it. It is of importance that examinations be made of the poultry food stuffs and afterwards of the excretion therefrom to note the amount of nutrition gained; to weigh fowls at different ages to compare the effect of certain food stuffs on them; to note the effect of food supplied in different seasons and also its effect on both sexes; and ultimately to obtain a standardised food at definite quantities which would give the best possible results.

8. In Beisan I found a light soil rich in manure while the abundance of water and the natural drainage is very appreciable. In my opinion and economically speaking, a land with such favourable conditions should be adapted to horticultural work rather than crop growing. On the acceptance of this suggestion I would point out that the system of irrigation should be thoroughly studied and modified. In support to this I would mention that a few weeks ago I received a sample of soil from Beisan Experimental Station to determine the nitrogen content which was suspected of being deficient. The analysis showed that the soil contained an excess of nitrogen, which ended the suspicion. Being in Beisan I seized the opportunity to see the place which was at the bottom of a slope and shadowed from the sun. There I found that that plot of land received the same amount of water as that supplied to other plots which are exposed to the sun. The only remedy is therefore to decrease the supply of water.

9. I understand that the question of irrigation was started by Mr. Camm, Station Superintendent of Beisan, who digged 15 pits to measure the depth of water in various places, but this work was abandoned after his leaving the place.

10. On the examination of the tabulated results obtained in this Station during the last three years, I found that little difference of inconsiderable value existed between cultivation, rotation, distance of place, and especially fertilization which is due to the uniform content of manure in the soil. It is therefore obvious that the rock phosphate experiment made last year did not give appreciable results because of the richness of the soil in manure. This experiment would be more useful in a land poor in phosphates.

11. I would not take the liberty to prolong my statement about my findings during this first visit to the Experimental Stations, but hope that the

Director will be good enough to explain to Mr. Raczkowski, when he is back from leave, the necessity of my paying more visits to all the experimental stations, so that I can be of more service in this line of work and especially during the absence of the Agricultural Chemist.

REPORT ON THE ANALYSIS OF THE SOIL
OF TULKAREM AGRICULTURAL SCHOOL.

8

On 6.1.30. fifty-nine soil samples were collected from the land of Tulkarem Agricultural School. Mechanical analysis and carbon dioxide determination were made of all the samples, after which twelve typical samples were chosen and were physically and chemically determined.

2. The mechanical analysis shows an exceedingly high percentage of silt and clay and the physical determination indicates a large water-holding capacity which mark the soil as heavy clayey soil.

3. The chemical determinations indicate an excess of potassium, phosphates and, in particular, nitrogen, showing that the soil is rich in humus which defines it as typically black soil.

4. The strong resistance of the soil to grinding initiated the idea that it may contain free sodium ions. As these readily attract the carbon dioxide in the air to form sodium carbonate which is very dangerous to plant growth, the soil was therefore tested for black alkalinity, but the negative results obtained disproved the idea. The hardness of the soil can therefore be attributed to the high content of clay and silt only.

5. It is therefore suggested that, as the soil is of very heavy and hard texture, proper drainage is necessary to improve irrigation, while forage crops are the only suitable plants to be grown on the soil.

6. I regret my inability to define the area, topography, geology, etc. of the soil, as I was never given the opportunity to go out to the fields to study and note such things as it happens in this case.

(sgd.) M. Puffeles.

REPORT ON THE ANALYSIS OF THE SOIL
OF TULKAREM AGRICULTURAL SCHOOL.

On 6.1.30. fifty-nine soil samples were collected from the land of Tulkarem Agricultural School. Mechanical analysis and carbon dioxide determination were made of all the samples, after which twelve typical samples were chosen and were physically and chemically determined.

2. The mechanical analysis shows an exceedingly high percentage of silt and clay and the physical determination indicates a large water-holding capacity which mark the soil as heavy clayey soil.

3. The chemical determinations indicate an excess of potassium, phosphates and, in particular, nitrogen, showing that the soil is rich in humus which defines it as typically black soil.

4. The strong resistance of the soil to grinding initiated the idea that it may contain free sodium ions. As these readily attract the carbon dioxide in the air to form sodium carbonate which is very dangerous to plant growth, the soil was therefore tested for black alkalinity, but the negative results obtained disproved the idea. The hardness of the soil can therefore be attributed to the high content of clay and silt only.

5. It is therefore suggested that, as the soil is of very heavy and hard texture, proper drainage is necessary to improve irrigation, while forage crops are the only suitable plants to be grown on the soil.

6. I regret my inability to define the area, topography, geology, etc. of the soil, as I was never given the opportunity to go out to the fields to study and note such things as it happens in this case.

(sgd.) H. Puffeles.

REPORT ON THE ANALYSIS OF THE SOIL OF
TULKAREM AGRICULTURAL SCHOOL.

'D'

On 6.1.30, 59 soil samples were collected from the land of Tulkarem Agricultural School. Mechanical analysis and carbon dioxide determination were made of all the samples, after which twelve typical samples were chosen and were physically and chemically determined.

2. The mechanical analysis shows an exceedingly high percentage of silt and clay and the physical determination indicates a large water-holding capacity which mark the soil as heavy clayey soil.
3. The chemical determinations indicate an excess of potassium, phosphorus and, in particular, nitrogen, showing that the soil is rich in humus which defines it as typically black soil.
4. The strong resistance of the soil to grinding initiated the idea that it may contain free sodium ions. As these readily attract the carbon dioxide ~~for~~ in the air to form sodium carbonate which is very dangerous to plant growth, the soil was therefore tested for black alkalinity, but the negative results obtained disproved the idea. The hardness of the soil can therefore be attributed to the high content of clay and silt only.

P. T. O.

2

5. It is therefore suggested that, as the soil is of very heavy and hard texture, proper drainage is necessary to improve irrigation, while forage crops are the only suitable plants to be grown on the soil.

6. I regret my inability to define the area, topography, geology, etc. -- of the soil, as I was never given the opportunity to go out to the fields to study and note such things as it happens in this case.

M. P.

A/AGRICULTURAL CHEMIST

DIRECTOR OF
AGRICULTURE
AND FORESTS.

REPORT ON THE ANALYSIS OF THE SOIL
OF TULKAREM AGRICULTURAL SCHOOL.

On 6.1.30. fifty-nine soil samples were collected from the land of Tulkarem Agricultural School. Mechanical analysis and carbon dioxide determination were made of all the samples, after which twelve typical samples were chosen and were physically and chemically determined.

2. The mechanical analysis shows an exceedingly high percentage of silt and clay and the physical determination indicates a large water-holding capacity which mark the soil as heavy clayey soil.

3. The chemical determinations indicate an excess of potassium, phosphates and, in particular, nitrogen, showing that the soil is rich in humus which defines it as typically black soil.

4. The strong resistance of the soil to grinding initiated the idea that it may contain free sodium ions. As these readily attract the carbon dioxide in the air to form sodium carbonate which is very dangerous to plant growth, the soil was therefore tested for black alkalinity, but the negative results obtained disproved the idea. The hardness of the soil can therefore be attributed to the high content of clay and silt only.

5. It is therefore suggested that, as the soil is of very heavy and hard texture, proper drainage is necessary to improve irrigation, while forage crops are the only suitable plants to be grown on the soil.

6. I regret my inability to define the area, topography, geology, etc. of the soil, as I was never given the opportunity to go out to the fields to study and note such things as it happens in this case.

(sgd.) M. Puffeles.

TRANSLATION

Petitioner: Nazmi Son of Sadiq Sukhun.
Tulkarm.

District Officer,
Tulkarm.

The piece of land located in the Southern boundary of the Agricultural School, Tulkarm, and North of the house of Mr. Ilias Soudah, has been the subject of negotiations between His Excellency the High Commissioner and ourselves for purchasing it for the Agricultural School, but in as much as the Tulkarm - Nathanya road, which commences from the station has separated our plot of land from that of the school, and the wire fencing that fenced our land has been removed to that of the school, and thus the school had no more relation with our land, therefore, I request you to take the matter with the Principal of the school for handing over the land to us, after knowing the details of the case from him.

Sgd. Nazmi Son of Sadiq Sukhun
Tulkarm.

143

Dear Dave,

I have to refer to your letter to me, No.15/14 of the 6th August 1934 on the subject of the diversion of the main road through the Tulkarem School grounds and to inform you that I referred the matter to Cust who informs me that he has already come to an agreement with Nathan on this matter. Cust further informs me that the exact alignment of the road was finally and satisfactorily determined at a meeting which he had arranged at Tulkarem on the 4th instant.

I hope therefore that all is now in order and that the new alignment will have removed the fears envisaged by the Principal of the School in his letter of the 26th July.

Yours Sincerely,

M.T. Dawe Esq. O.B.E.
Director of Agriculture & Forests.
Jerusalem.

Subject :- Re-alignment of Arterial
Road - Tulkarm.

Reference :- Paragraph 3 of A.D.C.'s
T/140/6-3234 of 4.9.34 to
Engineer i/c Nablus District.

I have agreed to the school boundary
being pushed back to a line which must pass
within a distance not exceeding 30 metres from
the most westerly point of the school garden.
This line was marked with stones on the ground
by the Engineer i/c who stated that this dis-
tance might in fact be less than 30 metres.

2. Please confirm.

Subject:- Re-alignment of Arterial
Road - Tulkarm.

Reference. Your B/17 of 10-7-34, and
My T/140/6 of 9-8-34.

I forward herewith a map, for which
a receipt is requested, signed by those concerned,
following the meeting held to-day at Tulkarm when
this matter was discussed.

The Directors of Education and
Agriculture empowered the representatives they
were good enough to send to give a decision on
their behalf so the matter may now be taken as
final.

The furthest limit to which the Elementary
Boys School Boundary might be pushed back was marked
on the ground. It will also be noted that 15m. would,
if necessary, be a sufficient distance between the
outside edge of the road and the swimming bath of
the Kadoorie School.

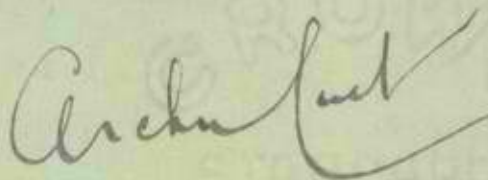

Any question of compensation claimed
by private owners of property affected by the
Scheme will be dealt under the appropriate legisla-
tion.

Rew
15.9.

I should be grateful if you would submit an estimate of the cost of the work. The provision of the necessary funds will then have to be considered and the apportionment of the costs, as the area in question lies within the Municipal Boundary.

It will be borne in mind that it is desirable to eliminate the present dangerous corners as soon as possible.

Subject:- Proposed Road adjoining
the Secondary Boys' School
at Tulkarm.

Reference. Your 321/47/1 of 8-8-34.

S. 165
There will be no question of commencing
work on the new alignment of this stretch of road
until all the authorities concerned, viz. your
Department, the Department of Agriculture and the
Local Authorities are in agreement with what is
proposed.

It is however most essential that
something be done soon to the eliminate two corners
which are a definite danger to traffic.

2. I am satisfied that the new alignment
according to the latest plan would bring the road
too near the swimming-bath of the Kadoorie School,
and the Engineer i/c Nablus District has been
requested by me to prepare a new survey to avoid
this difficulty. It appeared from examination on
the spot that this could be done without causing
any inconvenience to the Government School.

13.8.

Engineer,
I/c Nablus District,
Nablus.

Subject :- Arterial Road - Tulkarm.

Reference :- My letter No. T/140/6 of
21.7.34.

Referring to the recent meeting at

Tulkarm when the realignment of this road was
examined on the spot, I confirm that in my view
the present plan brings the road too close to
the swimming-bath of the Kadourie School,

especially as the bath is at a considerably lower
level than the road will be.

2. I consider the extreme limit of the
road should not be less than 20 metres from the
edge of the swimming-bath. It appeared further
that the line of the road could be drawn straighter
so as to eliminate the first curve also. This

may, however, entail a little more filling.

3. Mr. Nathan stated he felt sure his

Department would be prepared to surrender the

small area of land required, and it would not

affect the Government School area more than the

present proposals.

4. Would you please arrange for a new

survey accordingly and supply me with a map when

it is ready.

Assistant Director of Education,
Jerusalem.
Dear Sir:

Subject: Proposed new school at
Jerusalem, near the
University.

I have received from the Director of Public
Works a letter of correspondence dated 11th letter
from Engineer in Charge, Public Works, to the
Director of Public Works No. 117 dated 11th June
1951, on the above subject, together with copy of
letter from the Director of Public Works dated 11th June
1951 to you, No. 117/A dated 11th June, 1951.

Since the proposed road, if made, will cut
out a considerable section of land belonging to the
Government School, at present devoted to a playground,
and, moreover, will cut off a still
larger portion of the land belonging to the Government
Agricultural School, dividing the two properties
completely and leaving no part accessible very much
to the inconvenience, I must request that no action be
taken to put into effect the proposed road at least
the convenience of the Director of Agriculture and
result.

26th July, 1934.

Director,
Department of Agriculture,
Jerusalem.

Subject: Diversion of Main Road.
Reference: Your AG/15/14/A of 13.3.34.

I understand from the Assistant District Commissioner that the diversion is approved in principle pending your views on the matter.

I enclose herewith detailed plans as prepared by Public Works Department.

The proposed road will pass within 50 mts of the class rooms and within 5 mts of the swimming bath, in my opinion this is most undesirable for the following reasons :-

- 1) The students will be deprived of all privacy when bathing.
- 2) The dust set up by the heavy traffic will make it impossible to keep the water reasonably clean.
- 3) The noise created will make lecturing considerably more difficult.
- 4) Public Works Department have taken great pains to make the front of the school building pleasing but the view of it obtained from the road will be of the back.

No. TK/2/2/2

Subject: Lands
Diversion of main road
by school entrance.

Director,
Department of Agriculture,
Jerusalem

It is alledged that the new by-pass from the Tulkarm Station road will run through the School grounds between the Secondary School and the swimming bath, and I should be obliged if you would request confirmation of this project, and if in the affirmative, to lodge a protest.

Heavy motor traffic will be constantly using this road within a short distance of the school, and lecturing in the class rooms will be an impossibility on account of the noise.

A secondary point and a very important one is the depriving of the privacy for students bathing in the open air swimming bath.

Extension - Tulkarm School.

Dear Private Secretary,

With reference to conversation with His Excellency yesterday on the above subject, as to the area of the Tulkarm School land and the desirability of extending the area, should the extension of the School be authorised, I shall be glad if you will inform His Excellency that the actual area is 405 dunams and that I consider it may be usefully increased by another 100-200 dunams.

2. I am, however, seeking the opinion of the Principal on this point, whom I have instructed to submit a statement as to the necessity for any increase.

Yours sincerely,

Reference :- Your TK/1/A/2 of 4.4.31.

The District Officer, Land Registrar and Surveyor inspected the boundary of the school land and found out that no building has been made on the school land.

2. Three newly planted trees were seen inside of the boundary by 15 cms. These trees were planted before the new boundary marks, which are contested by the neighbour were fixed. The owner is prepared to remove them when you make sure that they are in school land.

3. On this occasion I would point out that for the purpose of avoiding any trespass, it is advisable in my opinion to have the whole of the Eastern Boundary fenced.

Sgd. Abdel-Nour

DISTRICT OFFICER.

DIRECTOR OF PUBLIC WORKS.

I am now advised by the Principal
of the above mentioned School that arrange-
ments have been made for work to begin at
once on the diversion of the road with the
assistance of your Foreman in charge.

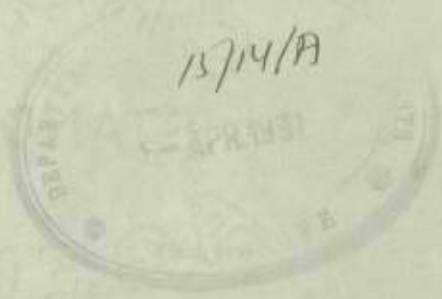

2. I shall therefore be very glad to
learn whether you may now be in a position
to put in hand the construction of the
necessary culverts.

DIRECTOR OF PUBLIC WORKS.

As it will only be necessary to fence one side of the diversion in question and grading will be done by prison labour, your Engineer in charge estimated that the cash expenditure of £P. 50 would suffice to cover the culvert and fencing.

2. The Principal of the School reports that labour will be shortly available and that the services of your clerk of works for supervision will consequently be utilised.

I also have no money available from my block vote for this work at present, but it may be possible to do something when all authorised services are completed and you have finally taken over everything.

In any case the work of grading the surface of the proposed road and forming side channels etc. would normally be done before fixing fencing etc. Therefore I suggest you might put this part of the work in hand at once and allow the service of my present Clerk of Works to be utilised whilst he is engaged on the completion of the fruit drying building etc. This will avoid further expense for bringing a special man for the road work.

Please say if you will do this, so that I may pass necessary instructions to Engineer in charge Nablus.

I do not think the works in connection with the proposed deviation should be put in hand until we have the formal agreement to the scheme by the District Officer on behalf of the residents of Tulkarem village.

They may possibly object to a "short cut" being considerably lengthened to suit the convenience of the school, whilst conferring no obvious advantages on the town generally.

14/4/1

14th November, 1930.

Director of Agriculture.

Subject : Agricultural School, Tulkarem

Reference: Your 15/20/A of 7.11.30.

The £P.350 referred to by you was the estimated cost of 1000 mr. of fencing to site along the Tulkarem Kalkiliyah road and down to railway, and included the paddock.

Your original idea was to plant a live hedge along all other boundaries including both sides of the retained track across the farm from West to East.

Later you wished to move effectively stop off the old track from Haifa crossing the farm from North to South. Accordingly you agreed to a temporary barbed wire fence about 850 meters long to be started from the nursery and continued along the railway in a North Easterly direction and then following the wadi to the N.E. corner of site.

The funds for this and other extra works you had asked for at the time that time were to be taken from the £P.300 allocated for tobacco curing building which building you agreed to cancel entirely.

Your memo 15/20/A dated 6.9.29 to your acting manager shows you were aware of the exact length to be then fenced.

You have since asked for special funds to enclose the Western boundary between the nursery and the Railway Station, but appear to have overlooked the 350 meters run of missing fencing along the N.E. boundary which you now ask for as if it formed a part of the fencing mentioned in para 3.

I regret I am unable to execute this length of fencing unless you can re-allocate the necessary funds viz 100 mils per mr.

I might also point out that no provision has ever been made for enclosing the extra piece of ground near the station that was acquired long after the original £P.350 was spent.

Director of Agriculture and Forests,
J e r u s a l e m.

Subject: Road at Tulkarem.

Reference: Your 15/14/A of the
10.11.30.

I have no objection to the location of the road and the taking over of the strip of land now suggested by the Director of Public Works, provided the alteration does not involve the Railway in additional expenditure. The narrow strip of land can be used for a plantation which will screen the backyards of the railway staff quarters and make a good back-ground for the station.

The original scheme drawn up by the Principal of the Kedcorie Agricultural School and myself was designed so that neither the School nor the Railway should lose any land.

The plans are returned to you.

JERUSALEM

November 24, 1930. (11)

Director of Agriculture,

Subject : Agricultural School Tulkarem.
Reference: Your 15/14/A dated 25.9.30. 119

I have examined the proposed realignment of the road now passing through the Farm as shewn on plan No. E/25/6 dated 19.8.30 prepared by Palestine Railways, and offer the following comments:

- (a) There is one right angle turn and one acute angle junction near the station which will make the approach from Haifa to the station and Kalkilieh very difficult, especially as the awkward junction occurs at the narrow bridge over the wadi passing under Tulkarem-Kalkilieh Road.
- (b) The new road must eventually become a first class road connecting Tulkarem with the projected arterial road from Jaffa to Haifa. The best possible line should therefore be decided on having in view the approach to the station from Kalkilieh Haifa and Tulkarem, and also the junction of the through roads connecting the three towns.

2. I submit an alternative plan No. N/82 dated 26.10.30 which in my opinion offers the best solution of the problem. You will observe that the farm loses a strip of land parallel to railway land by this scheme, which strip may be given to railways on condition that they provide any fencing required on their side of the road and erect nothing within 10 metres of the centre line of the new road.

3. A culvert will have to be constructed where the wadi will pass under the new road and a level crossing where our decauville occurs. Further expense will also probably be incurred

15 Dec 12/123
MD
GAB

2.

in grading, forming side channels, surfacing etc. even if the road is left as a track for the present. At present I have no funds available for this.

4. The fencing on the farm side will presumably have to be provided from Kadoorie funds. You have applied for extra LP.35 on this account, and this together with existing fencing that may be taken down and re-erected will probably suffice.

5. I presume you will now take up the matter with the authorities concerned and advise me when all consents have been obtained.

6. I return your plan as requested.

Public Road Through The Farm.
 Kadoorie Agric. School - Tulkarem.

- D. 1. Further my minute of the 12th inst. I have to inform you that yesterday 15th inst. I met Mr Taylor, D. E. Railways at Tulkarem and discussed the question of diverting the above road.
2. Mr. Taylor informed me that -
- i. it was impossible to divert the road along the west side of the line, as the Railways had not sufficient width of land, and the shunting in the yard would prohibit a level crossing at the station.
 - ii. therefore the new road would have to run along our west boundary - that is east of the line.
 - iii. The Tulkarem - Nablus line was built by the Turkish Government during the war out of the funds collected for the Hejaz railway. Therefore it is Trust Property and an equal exchange of land be observed.

"See
 D by D.

- iv. Mr Taylor stated that he is confident the Railways will give up the ground for a new road to run outside our west boundary but the School must return an equal area near the station.

The attached sketch shows -

1. old road (blue)
 2. new road (red.)
 3. area to be given to Railways (XXXXXX)
3. The approximate area, which will be given by the Railways for the new road is 3 dunams, and the same area is shown on the map thus (XXXXXX)
4. The new road will turn East opposite the Railway pump tower to the main Tulkarem road, and will be about 120mts. from the Dairy.
5. The right to run the trolley line from the Dairy to the Station will still remain.
6. Will you please study the question & give me your opinion.

Jerusalem

With ref to my aforementioned letter, I beg to state that
on 17/12/30 a Land Register Surveyor of Haifa Mr. Atlas was sent
to Tulkarem & entrusted to make a final map of the correct
school boundaries of a 1-1000 scale, which would guide in
settling all boundary disputes.

2. Up to the present, neither the map was completed nor were
disputes settled.

3. On 9/3/30 a letter was received from your office dated 28/2/30
of a commission that was to sit at Tulkarem for the final settlement
of disputes & definition of school boundaries. Furthermore several
hundred meters of boundary still remain unfenced and a main road
crossing the school farm is to be diverted.

4. All these questions I am sure you consider of large
importance.

5. I should appreciate an effective reminder being sent from your
side to the Lands Department, and a consequent speeding up
of the afove Commission's sitting at Tulkarem, with a view to
closing all our boundaries from outsiders, please

J. H. Al-Nadhal

Agricultural Roads

1. ^{Alp} When the new map is sent to you, will you please instruct your surveyor to put on our agricultural Roads.
2. As regards these roads and the iron pegs demarcating crossings - I regret having to inform you that at least 3 pegs are still wrong - Mr Hammad will show them to Mr Truhmorgen - They are in the orchard & vines.
Please instruct Mr Truhmorgen to correct.
3. Will you instruct Mr Truhmorgen to send Mr Hammad the 2 orchard maps.

to Mr Hammad

Reference your 15/14/A 28/2/30 اشارة الى

R/ Director
Dept of Agriculture & Forests
Jerusalem

I shall be glad if the Dept of Lands be
approached for the completion of the school maps,
and wish to state that I have been approached for
settling boundaries by neighbours.

Could I be informed when the a/m
Commissions is to sit for the definite settlement of
the Boundary problem, please.

Pl speak 2/1 15/4/30.
